

FLOWSTAR™ | ROADRUNNER®
HIGH-SPEED FLEXIBLE BEAUTY CARE
PRODUCT PACKAGING LINE

Capmatic® redefines the meaning of high-speed flexibility with the conception of a linear continuous-motion packaging line. The system is designed to reduce change-over time by half and to handle a wide range of products and containers including pucks. Many options are available such as:

- Automatic fill volume adjustment
- Production performance analysis
- Real-time production status notification

Applications: Shampoo | Conditioner | Lotion | Oil
 Cough Syrup

Speed*: Up to 250 BPM¹

Capmatic® Ltd. reserves the right to make changes without further notice to any described equipment characteristics and design specifications herein.
 *Speed and performance criteria are subject to testing with actual samples | ¹BPM: Bottle(s) Per Minute

INTREPID™ BVPC
NAIL POLISH MONOBLOCK SYSTEM

The Intrepid™ is a versatile explosion proof dual-indexing monoblock system capable of inserting stainless steel ball bearings, filling nail polish and gel, placing brushes and tighten caps. The system can be equipped with either vacuum, volumetric piston, or peristaltic pump depending on the product's viscosity.

Applications: Nail Polish | Gel Polish | Oil
 Semi-Viscous | Water-like Products

Speed*: Up to 120 BPM¹

PATRIOT™ FPC
COMPACT JAR FILLING
MONOBLOCK

The Patriot™ FPC is Capmatic's single-indexing monoblock customized to package both square and round containers. The system is equipped with assemblies to fill, place fitment or discs, and tighten caps. A special spinning mechanism is integrated to the filling system to ensure proper filling of square containers.

Applications: Cream | Water-like Products
 Lotion | Viscous & Semi-Viscous

Speed*: Up to 60 BPM¹

BAMBINO™ FC
FILLING - CAPPING MONOBLOCK

Capmatic's Bambino™ FC is a compact yet flexible monoblock system which can be configured to handle various cosmetic applications including small sample jars and fragrance give-away samples.

Applications: Balm | Lotions | Cream | Fragrance
 After-shave | Perfume

Speed*: Up to 40 BPM¹

CAP IN-FEED SYSTEM

FILLING | AIR RINSING

PRECISION | TORQUING

PERFUME PACKAGING LINE: FLEXIBLE PUCK HANDLING SOLUTION

Precision and accuracy is a standard for this fragrance packaging line. The integrated systems are configured to fill, crimp pump units, place spraying actuators, over cap, and label perfume container. To add flexibility and reduce change-over time, the line is designed to also handle pucks. Redundant inspecting systems are also integrated to ensure process compliance.

Applications: Perfume | Fragrance | Cream | Lotion
 Speed*: Up to 100 BPM¹

XP FILLING SYSTEM

Explosion proof filling unit designed to cosmetically dispense perfume.

VISION INSPECTION

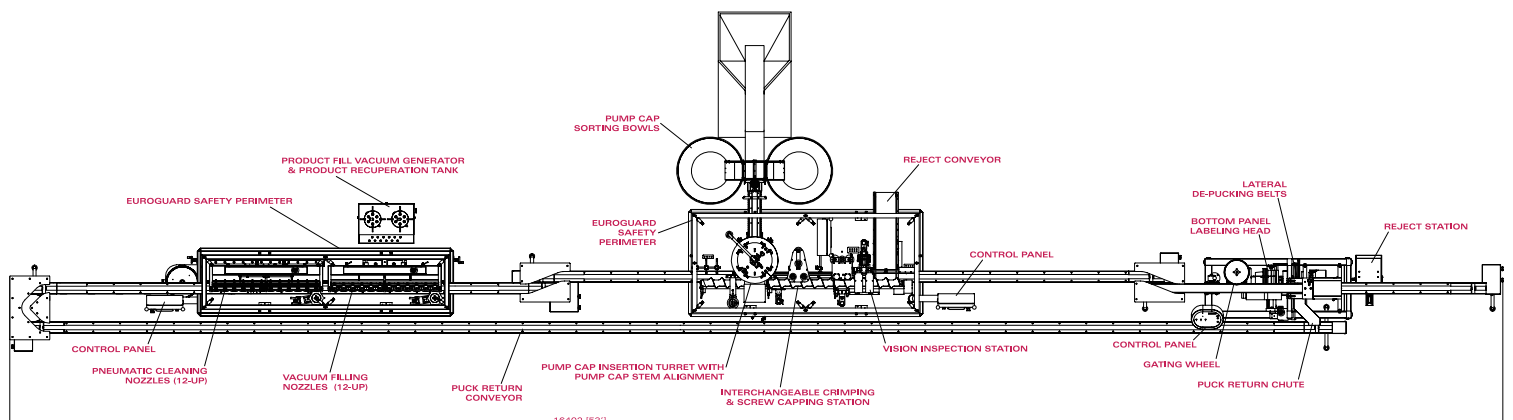

Vision inspection of proper cap positioning and alignment.

LABELING | DEPUCKING

Integrated depucking unit and bottom labeling system to reduce foot-print.
